PROFESSIONAL SUMMARY

Software Engineering undergraduate at Universiti Malaysia Sabah (UMS) with a strong interest in web development, software testing, and quality assurance. Experienced in developing web-based applications using Laravel, PHP, MySQL, HTML, CSS, and JavaScript, with knowledge of software development life cycle (SDLC), software testing principles, and database management. Currently developing a Web-Based Church Management System for the Archdiocese of Kota Kinabalu as a Final Year Project, involving full-stack development, system testing, and usability evaluation. Detail-oriented, eager to learn, and seeking a Software Engineering, Web Development, or Software Testing internship to apply technical skills in a professional environment.

EDUCATION

Bachelor of Computer Science (Hons.) – Software Engineering
Universiti Malaysia Sabah (UMS) | 2023 – 2027 | CGPA: 3.58 | BKNS Scholar

Labuan Matriculation College
Module III – Science Technology| 2022 – 2023 | CGPA: 3.21| MUET: Band 4.0

WORK EXPERIENCE

Part-Time Shop Assistant | Petronas Station, Sipitang | 2023

- Assisted customers with daily purchases and shop enquiries.
- Handled cashier duties and payment transactions.
- Replenished shelves and maintained shop cleanliness and product displays.
- Supported daily shop operations and customer service.

Part-Time Florist Assistant | Garden Florist Buhavan Square, Penampang| 2025

- Assisted customers with flower selections, floral arrangements, and purchases.
- Supported the preparation and wrapping of bouquets for customers.
- Maintained flower displays, product presentation, and shop cleanliness.
- Assisted with daily shop operations and customer service.

CERTIFICATION

PETRONAS BeDigital Bootcamp| 2025

- Participated in a two-day bootcamp focused on digital innovation, technology applications, and digital transformation.

MITE Generative AI Tools Training for the Workplace| Sponsored by Yayasan Peneraju| 2026

- Completed a two-day training programme training in generative AI tools for workplace productivity, workflow optimisation, and technology-driven problem-solving.

Gemini No-Code Hackathon| 2026

- Developing a no-code application prototype using Google AppSheet and Gemini AI to address real-world challenges through digital innovation and applying skills in application prototyping, workflow design, and AI-powered solution development.

SKILLS

Programming Languages: PHP, Java, JavaScript, HTML, CSS

Frameworks & Development Tools: Laravel, Android Studio, Visual Studio Code, XAMPP

Version Control: Git, GitHub

Database Management: MySQL, database design, CRUD operations

AI-Assisted & Low-Code Development: Claude, Google AI Studio, Lovable, Google AppSheet; AI-assisted coding, prompt-based prototyping, application development

Software Engineering: Software Development Life Cycle (SDLC), Waterfall methodology, requirements analysis, software documentation

Software Testing & QA: Functional testing, system testing, defect identification, integration testing, system usability evaluation (SUS)

UI/UX Design: Figma, Canva, Google Stitch, interface prototyping, responsive web design

PROJECTS

Web-Based Church Management System for the Archdiocese of Kota Kinabalu (Final Year Project) | HTML, CSS, JavaScript, PHP, Laravel, MySQL| 2026

- Developing a web-based management system to centralise church information, digital bulletins, announcements, sacramental services, donation management, catechesis and AI chatbot for all 23 churches in Kota Kinabalu
- Applying the Waterfall methodology and conducting User Acceptance Testing (UAT) and usability evaluation to validate system functionality and user requirements.

Parent-Teacher Communication App (SchoolFam)|Google AI Studio| 2025

- Collaborated on a parent-teacher communication application designed to improve information sharing between parents and teachers.
- Received Overall Best Project recognition and achieved first runner-up in a Technopreneurship Business Idea Pitching competition.

Smart Street Light System | ESP32, Arduino IDE, C++, PIR Sensor, LDR Sensor, Telegram Bot API | 2025

- Developed a solar-powered smart streetlight with automated motion and light detection.
- Integrated ESP32-CAM surveillance and Telegram alerts for remote monitoring.
- Conducted unit, integration, and field testing, achieving an estimated 80% energy reduction.

CONTRIBUTION & ACTIVITIES

- Treasurer – Program Kembara Jati Diri UMS (2024)
- Committee Member– Anti-Drug Prevention Club (2023 – present)
- AJK Food and Gift– SULAM Project at Masjid Al-Huda Kg. Unggun Jaya (2026)

HONOURS & ACHIEVEMENTS

- Best Project – SchoolFam (2025)
- Dean's List
