A REPORT PLATFORM

# UFixBah

## See A Problem? Fix It Bah!

An AI-powered platform using Gemini and AppSheet for UMS students and staff to report, track and prioritise campus facility issues.

INTRODUCTION

## 01 Infrastructure Problems

UMS communities face issues such as damaged roads, broken streetlights, blocked drains and water disruptions.

## 02 Reporting Difficulties

Reports may get lost in chats or go unnoticed, making it hard to know whether problems have been addressed.

**PROBLEM STATEMENT**

How can UMS provide a simple and effective way for students and staff to report campus issues, while helping the university identify urgent problems and manage maintenance more efficiently?

# Quick Overview: Idea & Main Function

## 01. Main Concept

A community-driven platform to report, track, and resolve road damage quickly and transparently.

REPORT | TRACK | RESOLVE

## 02. Core Function

One-tap photo reporting, Gemini AI auto-classification (severity & type), and real-time map alerts routed to the right authorities.

1-TAP PHOTO | GEMINI AI | MAP ALERTS

# BENEFITS

## 1. INSTITUTION

**Better Maintenance**
Helps UMS identify & prioritize urgent issues

**Data-Driven Decisions**
AI summaries & dashboards for recurring problems

**Improved Accountability**
Tracks reports, assigned departments & case status

## 2. STUDENT

**Easy Issue Reporting**
Report campus problems with photos & geotag locations

**Improved Campus Safety**
Helps students stay aware of active reported hazards

**Report Tracking**
Allows students to check real-time repair progress

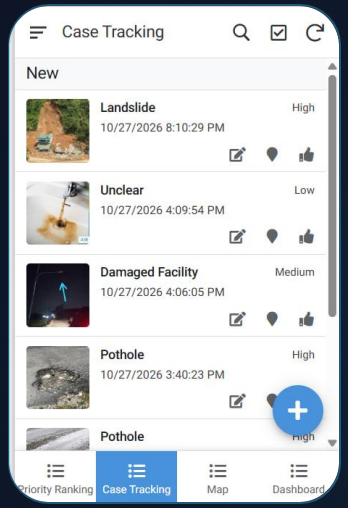

## 3. OVERALL IMPACT

U Fix Bah promotes a safer, more responsive campus by connecting students, staff, and maintenance teams.

# USER INTERFACE

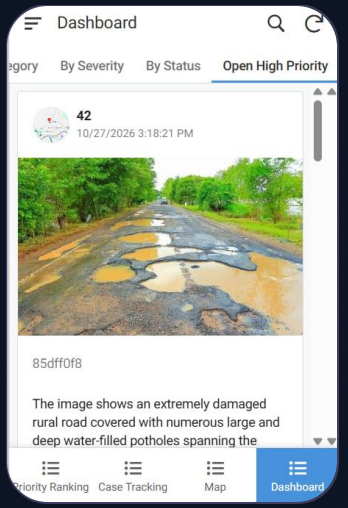

**Case Tracking**

Live status & report history

**Dashboard: Category**

Analytics by issue category

**Dashboard: High Priority**

Urgent issue tracking & action

# USER JOURNEY

**KEY TAKEAWAY**

Seamless AI-driven flow connecting users, community upvoting, and admin response for efficient campus issue resolution.

# SYSTEM WORKFLOW

**IMPORTANT NOTICE**

The system is intended to support, rather than replace, official maintenance procedures. AI assessments and priority recommendations should be verified by responsible personnel.
