TOO LAZY TO EDIT, SMART ENOUGH TO BUILD

50 companies.
50 cover letters.
1 very tired student

Applying for internships meant changing the company name, address, position and date in my cover letter over and over again *criess

It was repetitive, time-consuming and honestly.... I was tired of doing it manually!

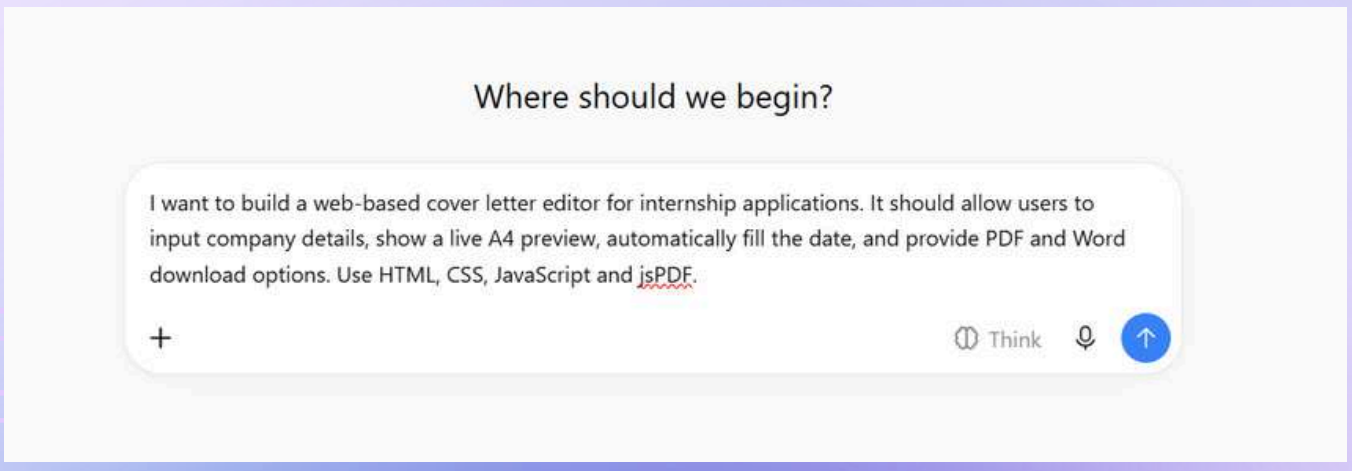

THERE HAS TO BE A SMARTER WAY ...

SO.. I MADE AI HELP ME BUILD A SOLUTION !

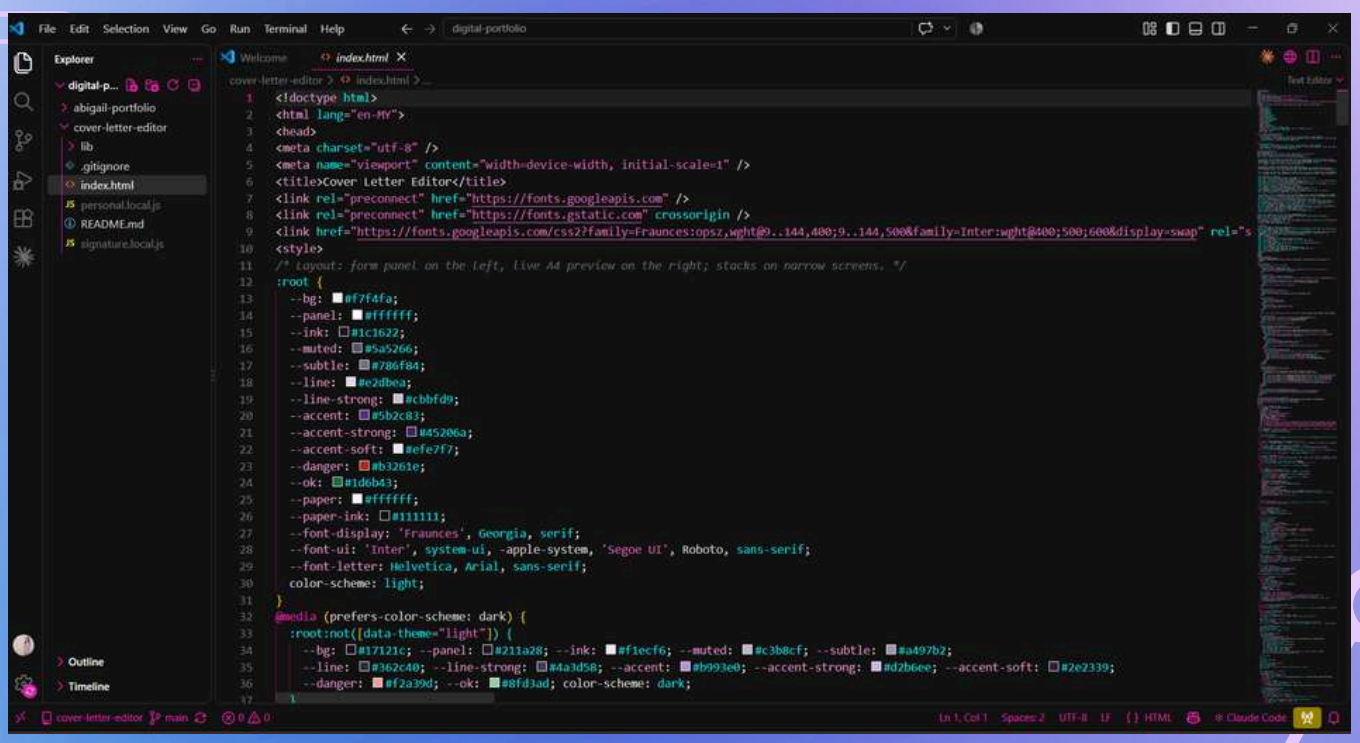

Instead of repeating the same edits, I used AI as my development assistant to help me build a personal Cover Letter Editor. It helped me with the layout, live A4 preview, automatic date, and one-click PDF downloads.

THE PROCESS....

MY AI PROMPT:

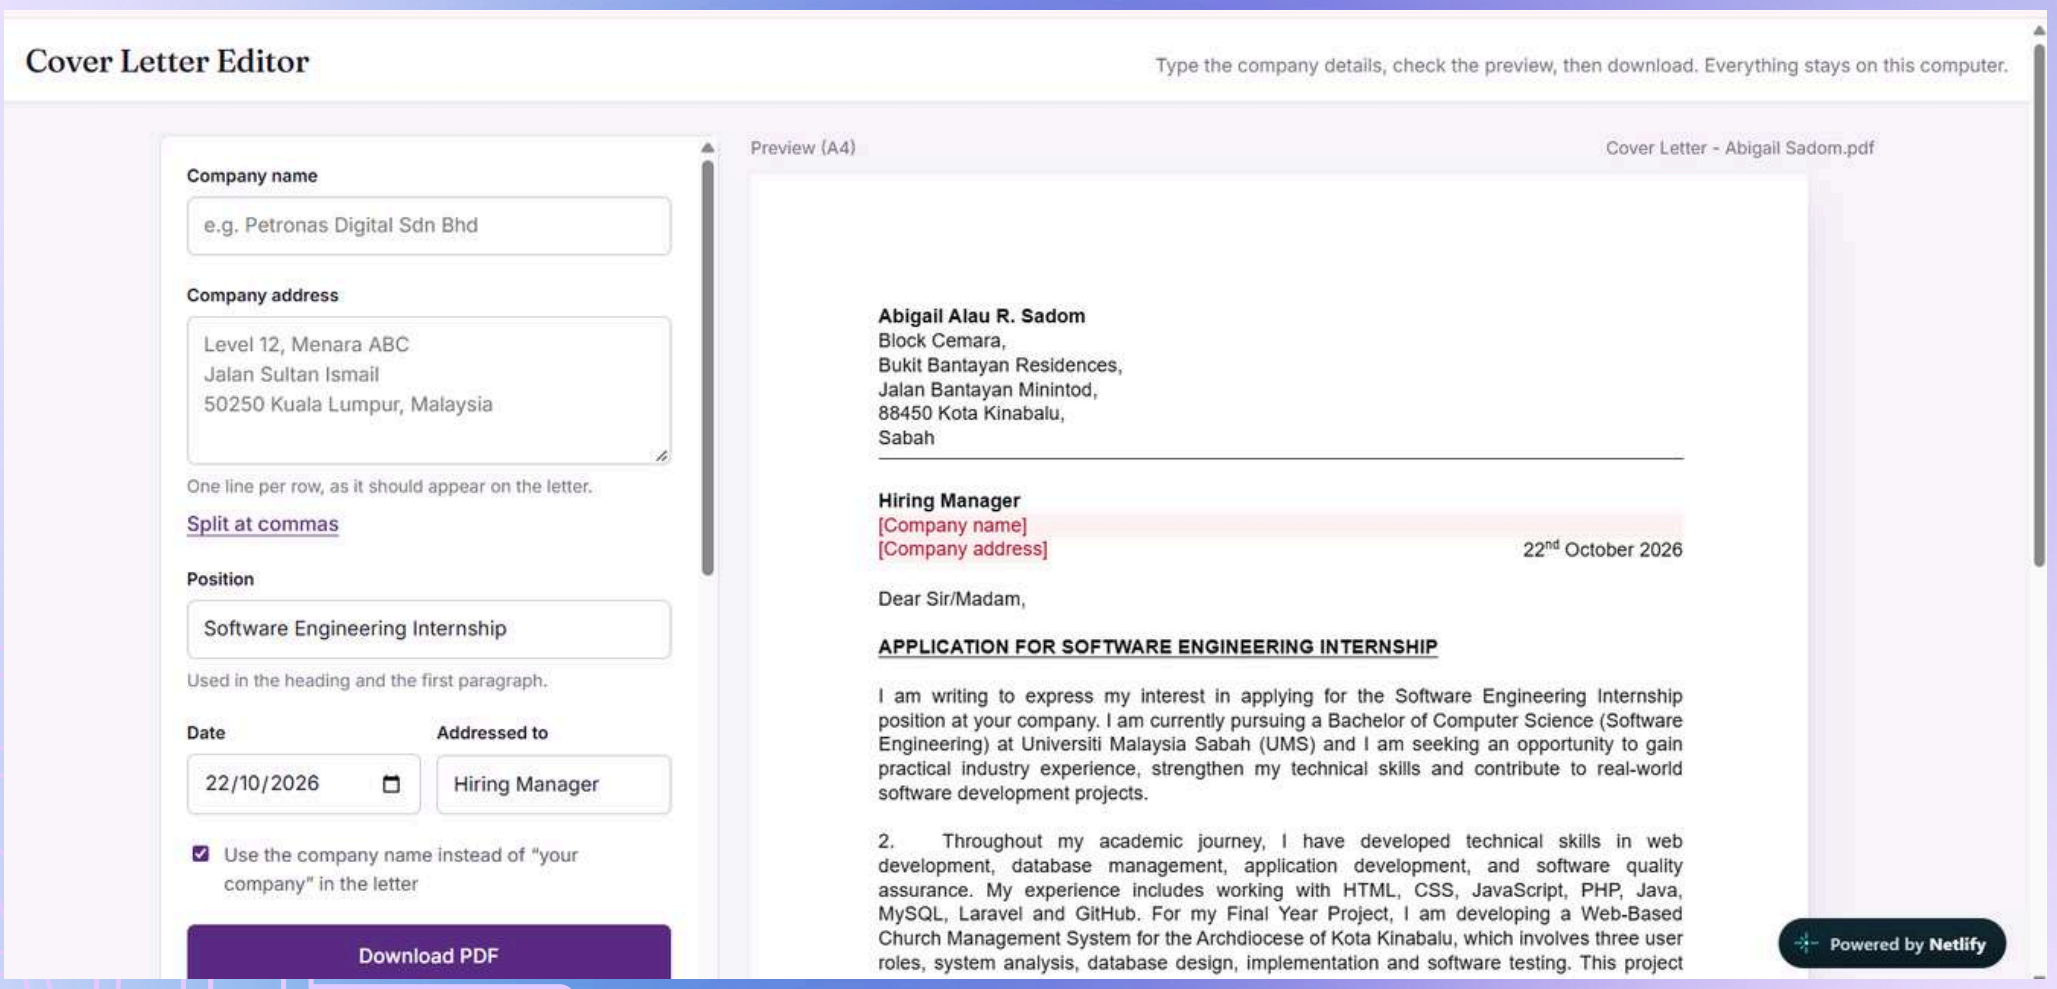

CODE:

FROM 5 MINUTE WORK TO 1 MINUTE...

From repetitive edits to a simpler workflow

[Cover Letter Editor]

LESS EDITING. MORE APPLYING
